

Interested in recruiting postdocs visiting researchers and PhD students

Adnane Achour ,

Project Determination of the crystal structures of *Streptococcus pneumoniae* associated virulence factors

et al *Plos Pathogens*

et al *Open Biology*
et al *mBio*

Project Development of MHC class I binding-altered peptides for vaccines

Publications :
et al *Cancer Research*
et al *Plos One*
et al

Interested in applications from postdocs

Igor Adameyko

Interested in recruiting PhD students and postdocs

_____ Deciphering regulatory T cell mediated suppression to find new therapeutic targets for immunological diseases

John Andersson

Interested in applications from PhD students

_____ *Microparticles in hemophilia – friend or foe - to improve hemostasis or contribute to atherosclerosis?*

Jovan P. Antovic

Jonas Axelsson

Translational research into uremic toxicity

Post Doc

_____ Translational studies of lipid mediators of inflammation and resolution in cardiovascular disease.

Magnus Back ,

Novel epigenetic biomarkers of hepatocellular carcinoma

Isabel Barragan

_____ Identification of Microbial and Dietary Metabolites with Effects on Innate Immunity

Peter Bergman

Birgitta Agerberth

Interested in recruiting PhD students

Nele Brusselaers

Helicobacter pylori (H. pylori)

H. pylori

H.pylori

H. pylori

Interested in applications from postdocs visiting researchers and PhD students for our collaboration with Nanjing Medical Univer regarding evaluation of the health care reform.

Kristina Burström

Interested in applications from postdocs and PhD students

Yihai Cao

Interested in applications from PhD students postdocs and visiting researchers

_____ Renal and Islet Microcirculation in Cardiovascular Disease and Type
Diabetes Role of oxidative-stress and nitric oxide deficiency

2

Mattias Carlstrom

,

Link _____:

Interested in applications from postdocs

_____ **Regulation of the epigenetic state of oligodendrocyte precursor cells**

Gonçalo Castelo Branco -

_____ Neurophysiological dysfunctions in Parkinson s disease ,

Karima Chergui

Interested in recruiting from all the categories PhD student postdoc and visiting ,
researcher.

Estrogen signaling in metabolic disease particularly type diabetes and, 2
breast cancer

Karin Dahlman Wright - ,

Interested in recruiting postdocs

Contribution of interactions between polycycl

Interested in applications from PhD students postdocs and visiting researchers

_____ Opioid related toxicities and their potential alternatives

Henrik Druid

Interested in recruiting PhD students and postdocs

Project Epigenomic signatures of transposable elements Bioinformatics (

Project Testing the histone code using synthetic acetylation

Project Viral delivery systems for amber suppression technology

Simon Elsassner

. Epigenomic signatures of transposable elements Bioinformatics ()

. Testing the histone code using synthetic acetylation

. Viral delivery systems for amber suppression technology

Interested in recruiting PhD students and postdocs

_____ Function and regulation of the alarmin HMGB in inflammatory conditions
such as arthritis

Helena Erlandsson Harris

Interested in recruiting a post doctoral fellow

in vivo

ex vivo

Interested in applications from postdocs and PhD students

_____ Novel approach for cancer treatment Biasing Receptor Tyrosine Kinase RTK
Signaling through G protein-coupled receptors GPCR ()

Leonard Girnita

Interested in applications from postdocs for a two year project

_____ BIOGERONTOLOGY AN OMICS APPROACH TO DISCOVER NEW BIOMARKERS
OF NEURODEGENERATION

_____ <http://ki.se/en/people/sarhag/> (/ / /)

_____ *omics*

Interested in recruiting PhD students postdocs researchers / /

_____ Genetics of primary immunodeficiency diseases

Lennart Hammarstrom

Interested in recruiting a PhD student or Post doc

Interested in recruiting a Postdoc in Translational Medicine

Thomas Helleday

Interested in applications from Visiting researchers postdocs and PhD students ,

Rikard Holmdahl

Developing a vaccine preventing rheumatoid arthritis addressing the precise autoimmune mechanisms.

The precise oxidative regulation of T cells studied with designed conditional and mutated mouse strains.

Interested in recruiting PhD students postdocs and visiting researchers

Lars Holmgren

Interested in applications from PhD students

Carl Christofer Juhlin ,

Interested in recruiting PhD students and postdocs

Henrik Larsson

Interested in recruiting postdocs

_____ Gene environment interactions behind coronary heart disease meta
analyses of genome wide association studies.

- -

Karin Leander

Interested in recruiting post docs PhD students and visiting researchers ,

Nailin Li ,

_____Platelet regulated CD T effector cell responses and their impact on atherosclerosis

_____ Platelet angiogenic activity and its role in cancer metastasis

Interested in recruiting postdocs

_____ **Identification of biomarkers and molecular mechanisms for periodontitis**

Tülay Yucel Lindberg ,

Interested in recruiting postdocs

_____ **Genetic variance in androgen metabolism in Chinese and Swedish women**

Angelica Lindén Hirschberg

Interested in recruiting a PhD student or a postdoc

_____ Myositis specific autoantibodies muscle biopsy features and clinical outcome in patients with myositis

Ingrid Lundberg

Objectives:

Project strategy

Importance of the project :

Interested in recruiting a postdoc or a visiting researcher

_____ A glioblastoma model in genetically modified mice ;
studies of stem cell phenotypes in the pre neoplastic brain

Monica Nistér

et al. Glia 57,

Interested in recruiting Post docs and PhD students

Daniel Nyqvist ,

in vivo

Qualifications of the applicant

Interested in applications from postdocs and PhD students

Sam Okret

Are you a Ph.D candidate or postdoc interested in the impact of sex hormones on lymphomas

-
-
-
-
-
-

in vivo

Leukemia __

in vitro *in vivo*.

Interested in applications from PhD students postdocs researchers / /

Qiang Pan Hammarström

Website :

Project I : *Regulation of immunoglobulin class switch recombination in human B cells*

Project II : *Discovery of therapeutic targets in B cell lymphoma by next generation sequencing*

Interested in recruiting postdoc or PhD student

National Award for Outstanding Self-financed Chinese Students Study Abroad 2014

Interested in applications from PhD students and postdocs

_____ Dynamics of regulatory RNA by NMR

Katja Petzold _____ ,

Interested in recruiting a postdoc

_____ Deciphering the role of *spv* virulence genes in systemic salmonellosis using

Interested in applications from postdocs and PhD students

_____ Clinical and translational research to increase the efficacy and safety of fertility preservation for young people with cancer

Kenny A. Rodriguez Wallberg

Interested in recruiting a postdoc

_____ Novel Mechanisms in the Growth and Rupture of Abdominal Aneurysms

Joy Roy

Interested in applications from postdocs

Matti Sallberg

Interested in recruiting PhD students

_____ Prevention of growth failure and osteoporosis caused by glucocorticoids

Lars Savendahl

Farasat Zaman

per se

•

•

et al

et al

•

et al

•

et al

resolution

in vitro

Interested in recruiting PhD student or postdoc

_____ **Influenza A virus perturbation of human dendritic cell function**

Anna Smed Sorensen _____ ,

Interested in applications from Postdocs

_____ **Normalizing alterations in glutamatergic neurotransmission in Parkinson's disease**

Per Svenningsson ,

Abstract :

Interested in recruiting in PhD students

Interested in recruiting postdoc or visiting researcher

_____ Statin modulate T cell function via lipid raft
with application in autoimmune disease and cancer.

Jesper Tegnér _____ ,

Email jesper.tegner@ki.se

Group home page _____ :

_____ we aim to elucidate the lipid raft change by statin treatment

in situ

Interested in applications from Visiting researchers postdocs and PhD students ,

_____ Lymphocyte dynamics during inflammation and re establishment of intestinal homeostasis.

Eduardo J. Villablanca

Interested in recruiting PhD student Postdoc Researcher / /

Interested in applications from PhD students and postdocs

_____ Psychosocial factors and neurodegenerative diseases and brain structural changes

Hui Xin Wang

Lifestyle factors and risk of dementia

Psychosocial factors and risk of dementia

Psychosocial factors and progression of coronary heart disease

Interested in receiving applications from Phd students and postdocs

_____ Antibodies in health and disease

Fredrik Wermeling

Interested in recruiting a post doctoral fellow months 2 4 ()

_____ Cognitive impairment cognitive restóration and early diagnosis in
Alzheimer s disease' a multimodal study of the cholinergic system

Eric Westman

Lars Olof Wahlund

Maria Eriksson

Daniel Ferreira

Interested in applications from postdocs and visiting researchers

_____ The role and function of CTLA in immune tolerance 4

Kajsa Wing

<http://ki.se/en/people/kajwin>
<http://www.inflam.mbb.ki.se/>

Interest in recruiting a PhD student

Interested in applications from PhD Students and Postdocs

_____ Can cognitive reserve counteract the risk effect of cardiometabolic disorders on dementia

Weili Xu

Interested in applications from PhD students postdocs and visiting researchers

_____ The role of non coding RNAs in human skin wound healing

Ning Xu Landén ,

ning.xu@ki.se

Interested in applications from Visiting researchers postdocs and PhD students ,

3_____ Manipulation of p family members to target p deficient and mutant 5
tumors

Joanna Zawacka Pankau -

Interested in applications from Visiting researchers postdocs and PhD students ,

_____ Identification of drug target and mechanism of action of anticancer molecules
using advanced proteomics

Roman A. Zubarev

Interested in recruiting PhD students or postdocs
